PROJECTS

- ✓ **Professional project:** built website for actual client with classmates and instructor overseeing. I participated in the project from conception to delivery of website to client.
- ✓ **Hackathon:** participated in Hack the Machine, the U.S Navy's cybersecurity hackathon. I was part of a team who attempted to hack a ship in the Maritime Capture the Flag challenge.
- ✓ **Austin Coding Academy** is a full-stack coding school that teaches web development through part-time classes taught by real developers. MERN stack – MongoDB Express React Node. Completed program and learned these concepts:
 - Mobile-first responsive web development
 - Code testing and peer review
 - Debugging and troubleshooting code via Chrome developer tools
 - Object oriented programming
 - RESTful API's and authentication
 - Development team experience
